

Product QA Summary & Recommendations

By: Sunday Chimezie Jephthah (QA Analyst & Automation Engineer)

1. Executive Summary

- Total Test Cases: 245
- Executed: 227 | Pass: 218 | Fail: 9 | Blocked: 0 | Not Run: 0
- Overall Pass Rate: 96.0%
- Defects: Total 35 | Open 13 | Closed 16
- Open Critical/Blocker: 1 | Open High: 3
- **Source** Test Cases & Bug Report Document

Release Recommendation: Go with Conditions

Rationale: 1 open Critical/Blocker; 3 open Highs; 9 failed tests pending retest.

Conditions:

1. Fix & verify the Critical/Blocker (include defect ID); complete targeted regression on impacted flows.
2. Resolve all open High severities or document mitigations with named owners & ETAs; ensure zero Highs on critical paths at release.
3. Raise module pass rates:
4. Notification, Teams, Subscription $\geq 98\%$ executed pass rate.
5. Legal Disclaimer & UI Behavior executed and $\geq 95\%$, or feature-flag/carve it out for this release.

6. Re-run all failed tests until 0 failures; confirm Blocked = 0 and Not Run = 0.
7. Confirm that monitoring & a tested rollback plan are in place.

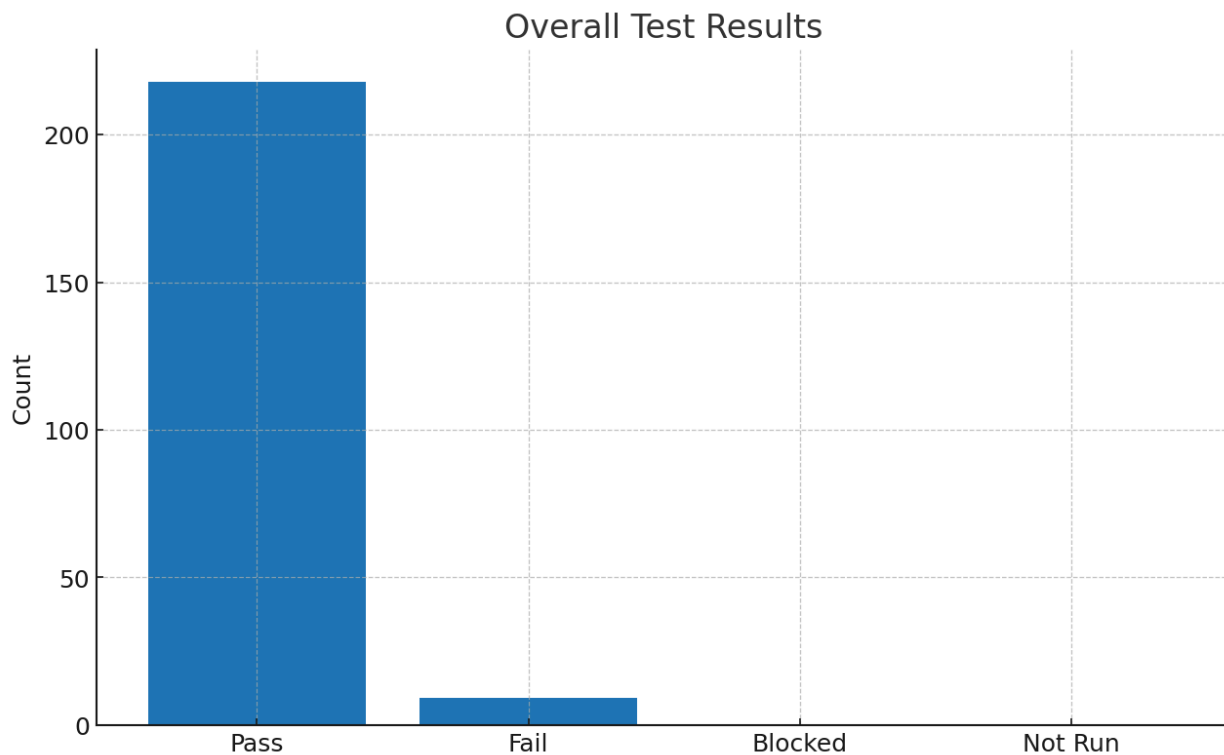

2. Scope & Approach

Scope: Manual functional testing across the modules represented by the workbook (per-sheet).

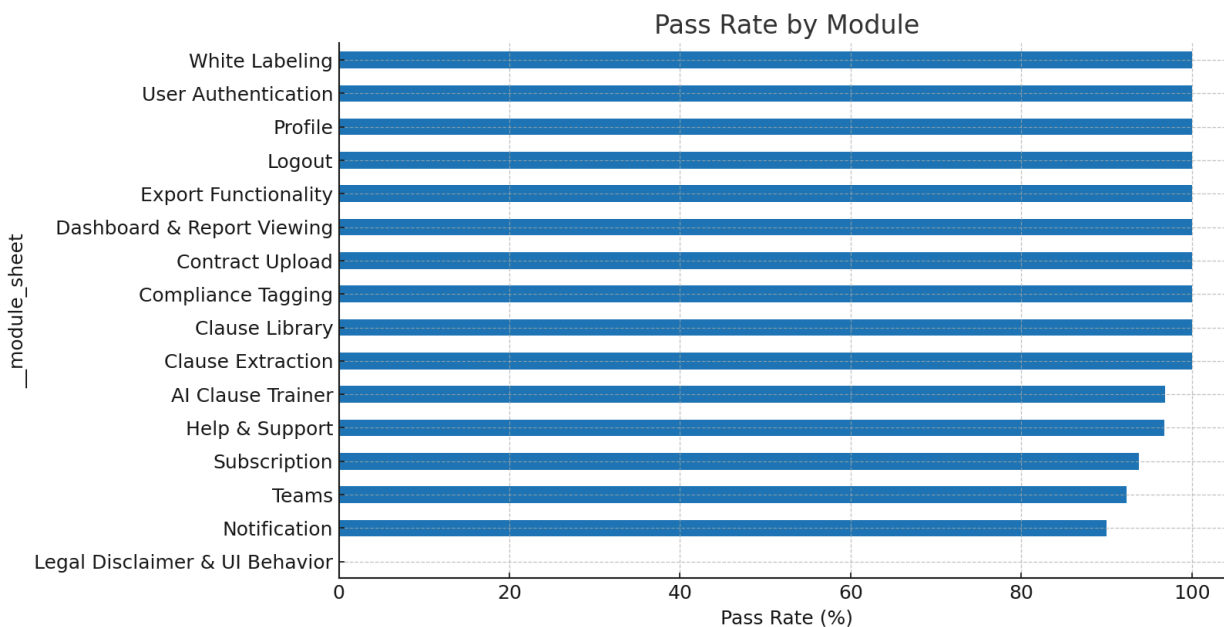

Approach: Positive, negative, and edge-case execution on staging; defects logged and triaged by severity & status.

3. Coverage & Execution Metrics

Overall Test Results:

Pass Rate by Module:

Lowest Pass Rates (bottom modules):

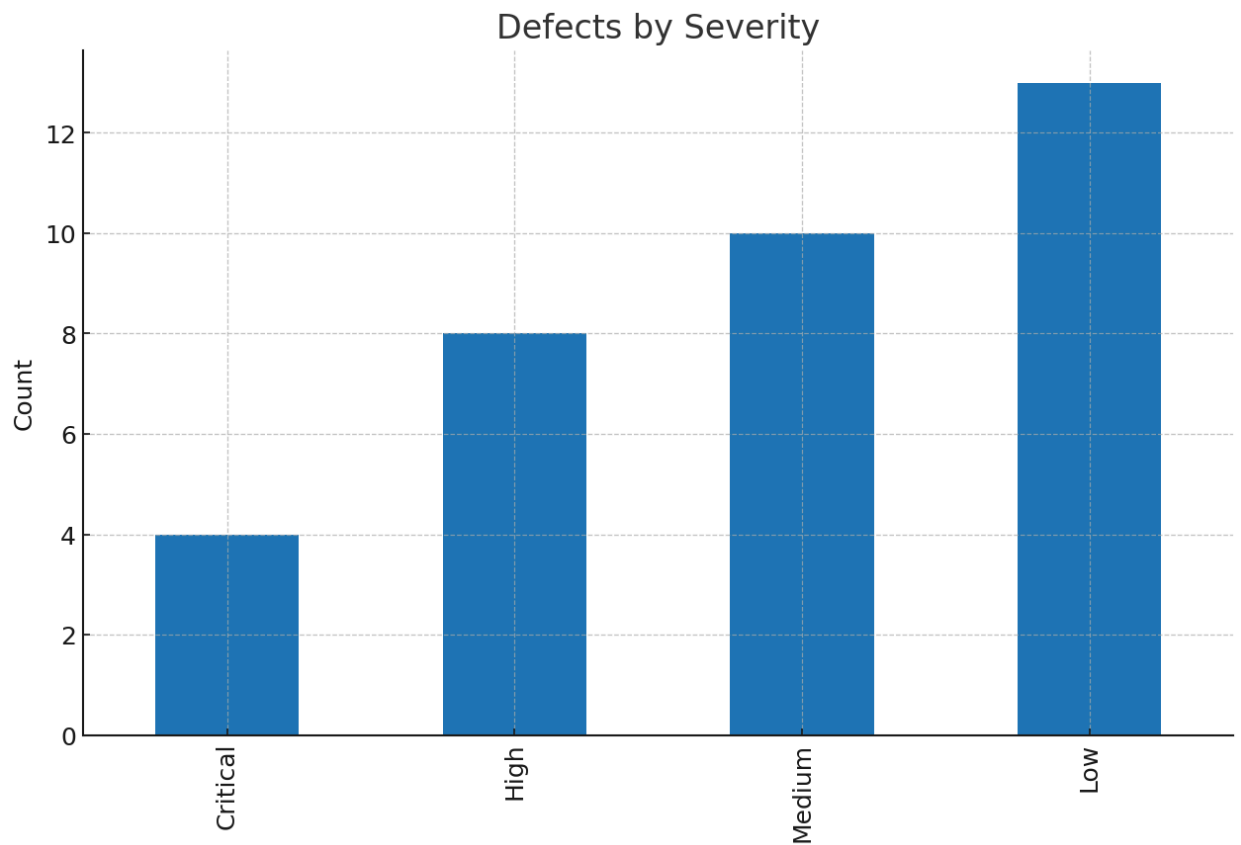

- Legal Disclaimer & UI Behavior: 0.0%
- Notification: 90.0%
- Teams: 92.3%
- Subscription: 93.8%
- Help & Support: 96.8%

Highest Pass Rates (top modules):

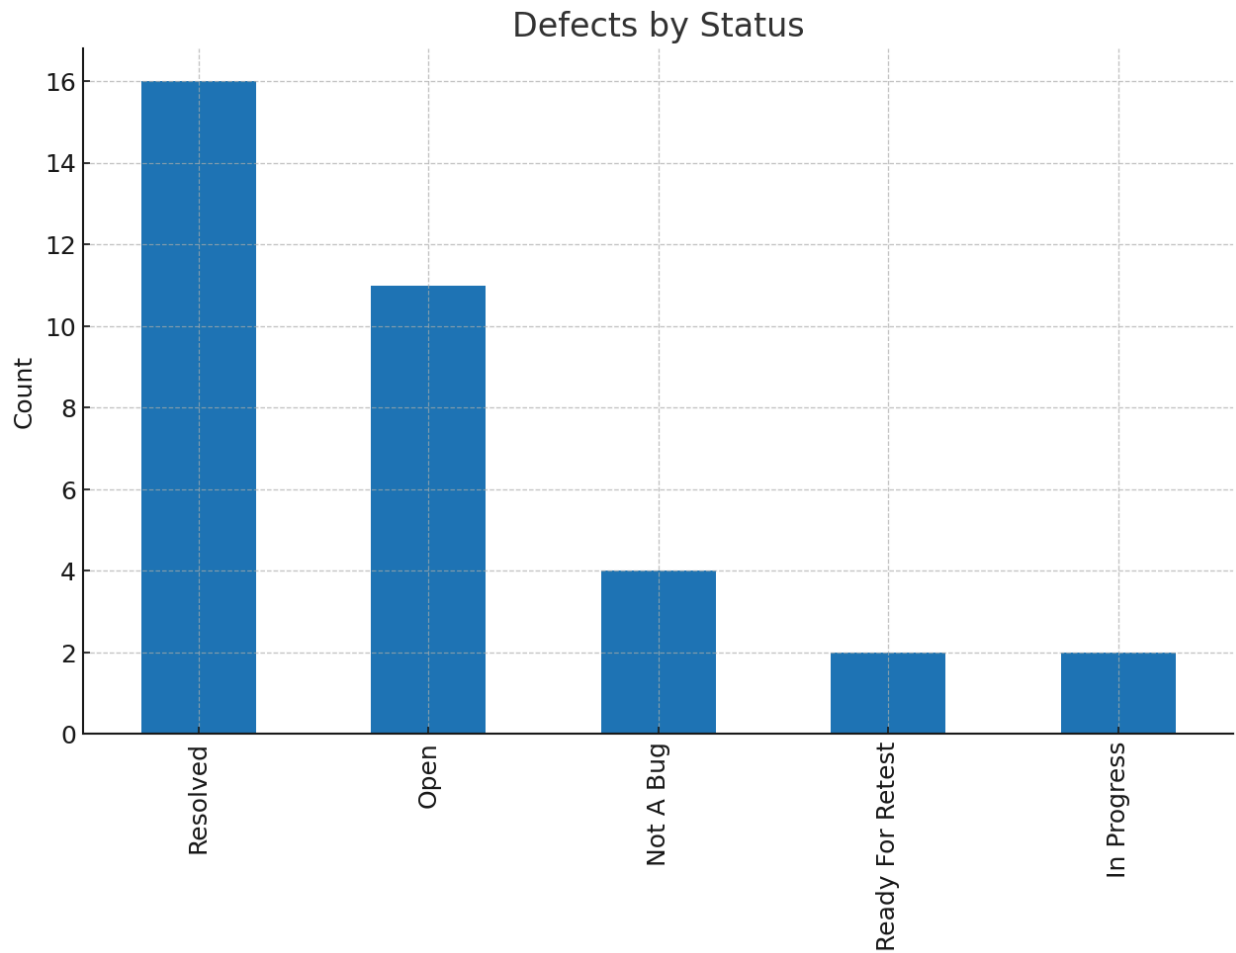

- Export Functionality: 100.0%
- Logout: 100.0%
- Profile: 100.0%
- User Authentication: 100.0%
- White Labeling: 100.0%

4. Defect Analysis

Defects by Severity:

Defects by Status:

5. Key Risks

- Open Critical/Blocker may affect core flows or compliance.

6. Recommendations

Short-term (Pre-release):

- Fix all Critical/Blocker defects; run targeted regression on impacted flows.
- Resolve High-severity defects or document mitigations with the ETA.
- Re-run all failed/blocked tests; stabilize test data and environment access.

Near-term (Post-release hardening):

- Automate smoke for login, contract upload, clause extraction, compliance tagging, subscription/payment.
- Harden server-side validation & UX for non-contract uploads to prevent false positives.
- Add monitoring/alerts for AI inference failures and upload parsing errors.

Appendix – Module Summary

Module	Pass	Fail	Blocked	Not Run	Executed	Pass Rate
Legal Disclaimer & UI Behavior	0	4	0	0	4	0.0%
Notification	9	1	0	0	10	90.0%
Teams	12	1	0	0	13	92.3%
Subscription	15	1	0	0	16	93.8%
Help & Support	30	1	0	0	31	96.8%
AI Clause Trainer	31	1	0	0	32	96.9%
Clause Extraction	7	0	0	0	7	100.0%
Clause Library	14	0	0	0	14	100.0%
Compliance Tagging	7	0	0	0	7	100.0%

Contract Upload	9	0	0	0	9	100.0%
Dashboard & Report Viewing	7	0	0	0	7	100.0%
Export Functionality	6	0	0	0	6	100.0%
Logout	7	0	0	0	7	100.0%
Profile	38	0	0	0	38	100.0%
User Authentication	11	0	0	0	11	100.0%
White Labeling	15	0	0	0	15	100.0%
