PROFESSIONAL SUMMARY

QA Automation Engineer with 5 years of testing web and mobile apps at scale. Strong in Python and JS/TS, building automated Web/Mobile/API tests (Selenium, Playwright, Cypress, Appium, Postman) and integrating them into CI/CD (Jenkins, GitHub Actions). Comfortable across functional, integration, regression, and stress testing, with hands-on SQL (MySQL) and solid Agile collaboration. I thrive in fast release cycles where QA owns release readiness and quality gates.

CORE COMPETENCIES (Role-Aligned)

- Languages: Python; JavaScript/TypeScript; Gherkin
- Web/UI Automation: Selenium, Playwright, Cypress
- Mobile Automation: Appium, Android Studio (Android)
- API Testing & Automation: Postman; REST; Chrome DevTools/console
- Database: MySQL (validation, test data setup)
- CI/CD & Monitoring: Jenkins, GitHub Actions; Datadog
- Test Management: Testmo, Xray; Jira, Confluence, Trello
- Methods: Black-box, white-box, integration, regression, performance; Agile/Scrum

- Currently upskilling: Docker & Kubernetes (for containerized test envs), AWS basics

PROFESSIONAL EXPERIENCE

Lead QA Engineer

OgunLabs — Remote / Jan 2021 – Present

- Drove end-to-end QA for SaaS web & mobile features; owned release sign-off based on automated + exploratory results.
- Built and maintained UI automation with Playwright/Cypress/Selenium (TS/JS) and mobile suites with Appium (Android).
- Created API test collections in Postman and integrated checks into CI for smoke/regression on every build.
- Hooked automation into Jenkins/GitHub Actions; added parallelization and artifacted reports for fast feedback.
- Used MySQL queries to validate data integrity and edge cases; monitored app health with Datadog.
- Authored test plans/cases, tracked defects in Jira/Testmo/Xray, and collaborated closely with dev/PM for triage.
- Simulated real-world user flows and device scenarios to improve stability pre-release.

QA Engineer (Contract)

Naurix Technologies — Remote / 2022

- Conducted end-to-end testing for mobile applications on iOS and Android using Appium.
- Automated critical test flows and improved test reliability and coverage.
- Produced detailed bug reports and collaborated with developers for issue resolution.
- Provided support and quality validation for mobile app releases.

QA Engineer

Genesys Tech Hub — Nigeria / Jan 2020 – Dec 2022

- Performed manual and automated testing for web applications.
- Developed test plans, test cases, and release sign-off reports.
- Automated frontend testing with Cypress and JavaScript.
- Conducted API testing and created reusable test collections using Postman.
- Collaborated with cross-functional teams in Agile sprints.

EDUCATION & CERTIFICATIONS

- B.Sc., University of Nigeria, Enugu Campus
- QA Automation Engineer, Testify Academy

ADDITIONAL SKILLS & TOOLS

- Platforms Familiarity: SQL databases
- Troubleshooting Skills: Proficient with debugging, integration, and data issues
- Documentation: Known for writing clear, concise bug reports, test cases, and troubleshooting guides
- Remote Work: Experienced in asynchronous communication and working across time zones

AVAILABILITY

- Open to full-time remote roles aligned with European or African time zones.
